Cost Centers

Organize your fleet operations and data by location, region, or other business unit

Bestpass is in the business of saving its customers time and money on toll, both on the road and in the back office. To date, we've saved customers more than $150 million.

A cost center is a department or other business unit to which costs may be charged for accounting or administrative purposes. Many of our customers want to have their data broken out by location, terminal, region, or some other division. Bestpass makes it easy for this data to be managed and securely accessed via our cost center functionality.
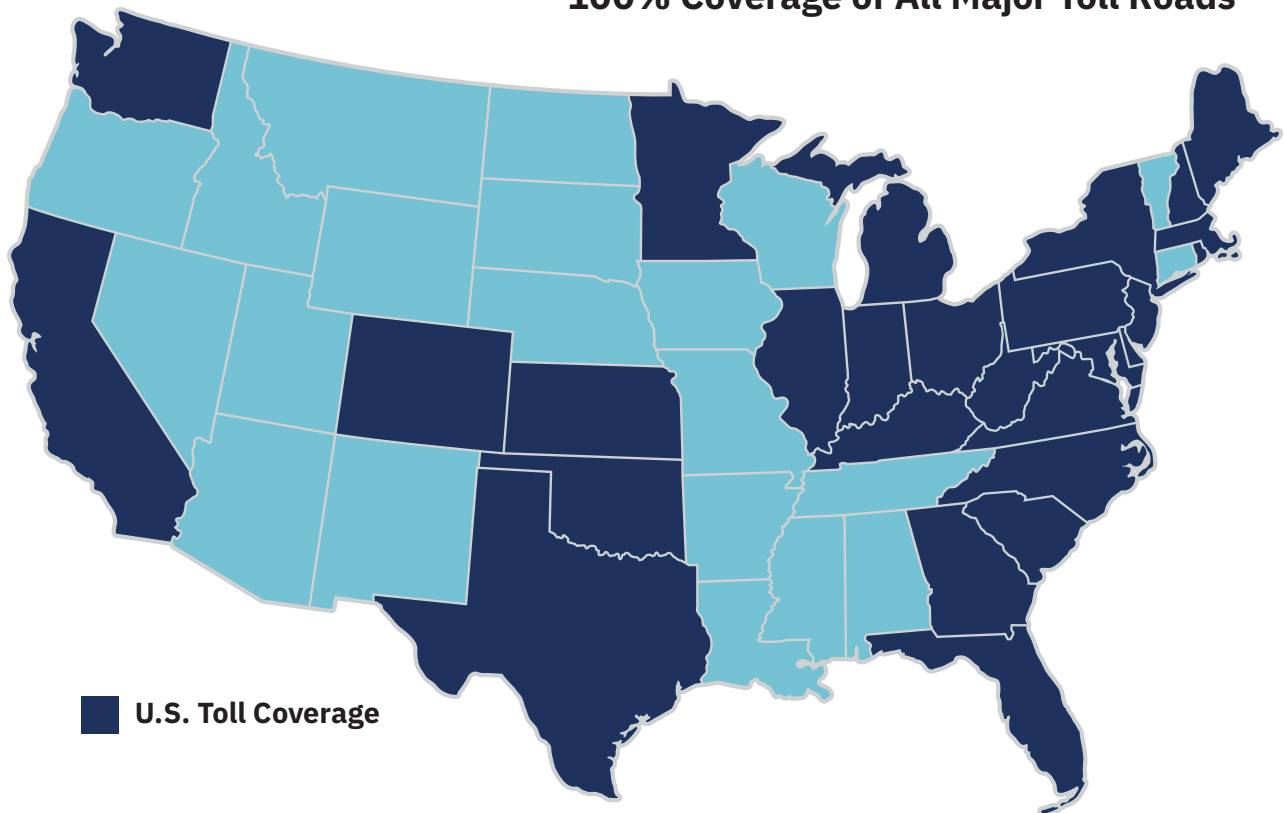

Benefits

- Unlock more efficient accounting
- Localize account management
- Gain greater insight into overall operations
- Allocate all toll-related cost by business unit
- Enable terminal managers and other employees to manage their own data
- Update cost centers via powerful customer web portal

The Best Coverage
Over 40 tolling authorities and 100% of major U.S. toll roads

100% Coverage of All Major Toll Roads

U.S. Toll Coverage

How it Works

User Role Maintenance

The User Role Maintenance feature allows a User Manager to assign user roles, based on responsibility. Five distinct roles grant access to specific functionality and pages in the customer web portal, including:
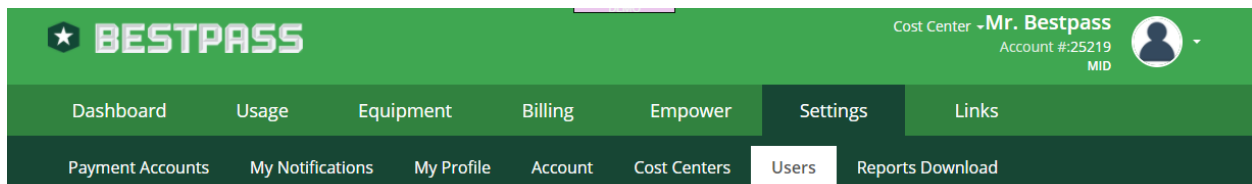

- User Management: complete access and ability to assign roles
- Cost Center: permission to change and update cost centers
- Ordering: permission to order transponders and update vehicle information
- Empower: permission to access data analytics and reporting
- Accounting: permission to access statement and payment information

Orders by Cost Center

Orders by Cost Center helps to mitigate unassigned transponders, as well as to help you organize your fleet by business unit. Users are able to filter and search by cost center from the order listing page.

Itemized cost center statements

- You will benefit from more dynamic cost center management functionality, including the ability to generate dedicated statements for each cost center
- Users can run cost center statements at any time within the Empower section of the customer web portal
- Anything that can incur cost can be assigned back to a cost center
